

SUMAPS 5193: Statistics for Sustainability Management
Instructors: Bruce M. Kahn, Ph.D.
Spring 2018

Course Overview

The course introduces practitioners sustainability management to the data analysis techniques and statistical methods which are indispensable to their work. The class teaches how to build statistical substantiation and to critically evaluate it in the context of sustainability problems. The statistics topics and examples have been chosen for their special relevance to sustainability problems, including applications in environmental monitoring, impact assessment, and econometric analyses of sustainable development. Students are assumed to have had no previous exposure to statistics.

Course Objectives

This course demonstrates how to conduct a quantitative analysis of an organization's work processes and operations, resource utilization, and environmental impact necessary to create a rationale for implementing sustainability initiatives. Statistical topics, including probability and random variables, will be discussed in both theory and in their practical applications for sustainability managers. This course will provide students with the skills to conduct regression analysis, to conduct hypothesis and estimation testing, to design surveys, and to prepare statistics packages. These quantitative skills are necessary for a professional manager responsible for the management of people, finances and operations toward sustainability goals.

Course Content

Session 1 Introduction

General Research Methodology: Inductive Method, Hypothetico-Deductive Method, Experimental and Non-Experimental Design, Causal Inference; The Uses of Statistics in Sustainability Studies: Impact Assessment, Monitoring, Auditing, Polling; Using Statistics in Research: Sample vs. Population, Description vs. Inference, Sampling Error and Bias

Readings: Leekley, Chapter 1 and Chapter 2.

Session 2 Describing Data: Tables and Graphs

Measures of Central Tendency: Mean, Median, Mode, Advantages and Disadvantages; Measures of Dispersion: Mean Absolute Deviation, Variance and Standard Deviation, Quantiles and Inter-Quartile Range; Skewness and Kurtosis; Plots: Histogram, Q-Q, ECDF, Box, Scatterplot, Smoothers

Readings: Leekley, Chapter 2
Corporate Ecosystems Review (WRI)

Session 3 Describing Data: Summary Statistics

Measures of Central Tendency: Mean, Median, Mode, Advantages and Disadvantages; Measures of Dispersion: Mean Absolute Deviation, Variance and Standard Deviation, Quantiles and Inter-Quartile Range; Skewness and Kurtosis; Plots: Histogram, Q-Q, ECDF, Box, Scatterplot, Smoothers

Readings: Leekley, Chapters 3,

Homework 1: Exercises from Leekley Chapters 2

Assessing social responsibility: A quantitative analysis of Appraisal in BP's and IKEA's social reports

<http://dcm.sagepub.com/content/6/1/55.full.pdf+html>

Corporate Management, Industry Competition and the Sustainability of Firm Abnormal Profitability

<http://link.springer.com/content/pdf/10.1023%2FA%3A1022489324208>

Session 4 Basic Probability

The Origins of Probability Theory; Events; The Laws of Probability; Probability of A or B; Conditional Probability; Joint Probability; Bayes' Rule; Permutations and Combinations, Discrete vs. Continuous, Category vs. Ordered vs. Quantitative; Expected Value, Variance; Discrete Random Variables: Binomial, Poisson, Hypergeometrics; Continuous Random Variables: Normal, Chi-Squared, Exponential

Readings: Leekley, Chapter 4,

Abbet et al. 2012. Organizational culture and the success of corporate sustainability initiatives: An empirical analysis using the Competing Values Framework.

Lennox and King. Does it pay to be green? 2010.

Homework 2: Exercises from Leekley Chapters 3.

Session 5 Probability Distributions

The Origins of Probability Theory; Events; The Laws of Probability; Probability of A or B; Conditional Probability; Joint Probability; Bayes' Rule; Permutations and Combinations, Discrete vs. Continuous, Category vs. Ordered vs. Quantitative; Expected Value, Variance; Discrete Random Variables: Binomial, Poisson, Hypergeometrics; Continuous Random Variables: Normal, Chi-Squared, Exponential

Readings: Leekley, Chapter 5,

Deriving sustainability measures using statistical data: A case study from the Eisenwurzen, Austria.

<http://www.sciencedirect.com/science/article/pii/S1470160X09001411>

Life Cycle Tools within Ford of Europe's Product Sustainability Index
<http://link.springer.com/content/pdf/10.1065%2F1ca2006.08.267>

Modelling More Sustainable Aluminium
http://www.alcoa.com/sustainability/en/pdfs/KMartchek_IJLCA_7772.pdf

Homework 3: Exercises from Leekley Chapter 4

Session 6 Sampling and Sampling Distributions

Random sampling, stratified sampling, cluster sampling, the t-table, Environmental Sampling, Surveys and experiments; Experimental design; Constructing Samples; Constructing indices and scales; Examples of bad survey questions; Replication in natural vs social sciences.

Readings: Leekley, Chapter 6,

Chapter 12 of *The Signal and the noise*, Nate Silver.

Homework 4: Exercises from Leekley Chapter 5

Session 7 Estimation and Confidence Intervals

Point and interval estimators, estimate of proportion, populations mean

Readings: Leekly Chapter 7.
Dimson et al, 2012
Evans and Peiris, 2010

Homework 5: Exercises from Leekley Chapter 6

Session 8 Hypothesis Testing

Independence of Observations Central Limit Theorem Sampling Distributions Tests for distribution (Kolmogorov-Smirnov, Q-Q tests). The one-sample t-test for a population mean; One-sample Chi-squared test for population variance; Two-sample t and z tests for population mean; two-sample z test for population variance

Readings: Leekley, Chapter 8,

Homework 6: Exercises from Leekley Chapter 7

Midterm Due: Distributed on Feb 28. Review Eccles paper and develop research proposal

Session 9 Hypothesis Testing

Independence of Observations Central Limit Theorem Sampling Distributions Tests for distribution (Kolmogorov-Smirnov, Q-Q tests). The one-sample t-test for a population mean; One-sample Chi-squared test for population variance; Two-sample t and z tests for population mean; two-sample z test for population variance

Readings: Leekley, Chapter 9

Guenster et al., 2006

Lev et al., 2008

Homework 7: Exercises from Leekley Chapter 8

Session 10 Hypothesis Testing

Independence of Observations Central Limit Theorem Sampling Distributions Tests for distribution (Kolmogorov-Smirnov, Q-Q tests). The one-sample t-test for a population mean; One-sample Chi-squared test for population variance; Two-sample t and z tests for population mean; two-sample z test for population variance

Readings: Leekley, Chapter 10

Groysberg et al., 2008

Crook et al. 2011.

Homework 8: Exercises from Leekley Chapter 9

Session 11 Hypothesis Testing

Independence of Observations Central Limit Theorem Sampling Distributions Tests for distribution (Kolmogorov-Smirnov, Q-Q tests). The one-sample t-test for a population mean; One-sample Chi-squared test for population variance; Two-sample t and z tests for population mean; two-sample z test for population variance

Readings: Leekley, Chapter 11

Edmans, A., 2011.

Harjoto and Jo, 2011

Homework 9: Exercises from Leekley Chapter 10

Session 12 Regression Analysis

Covariance and Correlation, Spearman Rank Correlation, Correlation Tests; Scatterplot and Univariate Regression. Regression Error, Coefficient of Determination; Assumptions of the Linear Regression Model; Multivariate regression, Hypothesis Tests about Coefficients and the Model; Specification; Missing Data; Heteroschedasticity; Discrete Dependent Variables

Readings: Leekley, Chapters 12

Semenova and Hassel, 2008.
Garz et al. 2002

Homework 10: Exercises from Leekley Chapter 11

Session 13 Regression Analysis

Covariance and Correlation, Spearman Rank Correlation, Correlation Tests; Scatterplot and Univariate Regression. Regression Error, Coefficient of Determination; Assumptions of the Linear Regression Model; Multivariate regression, Hypothesis Tests about Coefficients and the Model; Specification; Missing Data; Heteroschedasticity; Discrete Dependent Variables

Readings: Leekley, Chapters 13
Olsson, 2007.

Homework 11: Exercises from Leekley Chapter 12

Session 14 Time-Series Analysis

Exploiting patterns over time, basic components of a time series, seasonal variation, the long-term trends, the business cycles, forecasting.

Readings: Leekley Chapter 14
Allouche and Larouche 2005, Amman et al. 2010.

Homework 12: Exercises from Leekley Chapter 13

Homework: Final Exam Presentations

Session 15 Environmental Applications of Statistics

Environmental Valuation: Hedonic Pricing Models, Stated Willingness to Pay, Travel Cost Models, Random Utility Models; Environmental monitoring: Designs, CUSUM Charts, Chi-squared Tests; Spatial data: Quadrat Counts, Tests for non-uniformity, Spatial Autocorrelation and Variograms,, Kriging.

Readings:

Homework 13: Exercises from Leekley Chapter 14

Homework: Final Exam Presentations

Session 16: Final Exam Presentations

Method of Instruction and Evaluation

The course is based on 200 points.

Homework Assignments: There will be 13 weekly problem-solving assignments each worth 10 points for a total of 130 points.

Participation: Each student will make a presentation on the weeks reading “sustainability” reading assignments plus their active participation in class worth 10 points

Tests: There will be a take-home midterm exam and a take-home final, each worth 30 points.

The Midterm is due on March 19th.

The Final Exam is due on May 7th.

I will hold office hours on Tuesdays from 6:30-7:45 pm at 2929 Broadway, by appointment.
Recitation Periods TBD

Text Books

Robert M. Leekley, Applied Statistics for Business and Economics, CRC Press, 2009, ISBN #978-1-4398-0568-8

All additional readings will be listed in Courseworks. Any readings whose full-text is not available through the links in Courseworks will be placed on reserve at the Library.

Additional Books of Interest on Reserve:

- The Black Swan: The Impact of the Highly Improbable Nassim Nicholas Taleb
- Moneyball: The Art of Winning an Unfair Game, Michael Lewis
- Freakonomics: A Rogue Economist Explores the Hidden Side of Everything, Steven Levitt and Stephen J. Dubner.
- How to Lie with Statistics, Darrell Huff
- The Signal and the Noise: Why So Many Predictions Fail — but Some Don't , Nate Silver
- Capitalism at a Crossroads, Stuart Hart

Policies

Academic Integrity

The School of Continuing Education does not tolerate cheating and/or plagiarism in any form. Those students who violate the Code of Academic and Professional Conduct will be subject to the Dean's Disciplinary Procedures. The Code of Academic and Professional Conduct can be viewed online:

<http://ce.columbia.edu/node/217>

Please familiarize yourself with the proper methods of citation and attribution. The School provides some useful resources online; we strongly encourage you to familiarize yourself with these various styles before conducting your research:

<http://library.columbia.edu/help/howto/endnote.html>

Violations of the Code of Academic and Professional Conduct will be reported to the Associate Dean for Student Affairs.

Accessibility Statement

Columbia is committed to providing equal access to qualified students with documented disabilities. A student's disability status and reasonable accommodations are individually determined based upon disability documentation and related information gathered through the intake process. For more information regarding this service, please visit the University's Health Services website:
